EDUCATION

University of Auckland

Auckland, NZ

Bachelor of Science in Computer Science

Graduated 2026

- **Coursework:** Software Engineering, Web Programming, Human-Computer Interaction, Databases, IT Infrastructure, Cyber Security, Operating Systems

EXPERIENCE

Full-Stack Developer

2026

Web Development & Consulting Club (WDCC), University of Auckland

Auckland, NZ

- Build features for a membership and payments platform for the UoA Investment Club in a **10-person team**
- Develop in **Next.js**, **TypeScript** and **Tailwind CSS** on Payload CMS, turning designs into working interfaces
- Integrated **3 APIs**: Stripe payments, Google OAuth (Better Auth) and AWS S3 storage

Freelance Graphic Designer & Video Editor

Jun 2024 – Present

*Kelvstudio_*

Auckland, NZ (Remote)

- Handle client requests from first message to delivery for NZ and international clients
- Created a tutorial channel with **58,000+ views** across 25 videos, explaining software step by step
- Bring a designer's eye to front-end work, so I work well with UX/UI teams

Process Worker

2021 – 2025

Much Moore Ice Cream Company Ltd

North Shore, Auckland

VOLUNTEERING

FCC Attendance Tracker

2026

Favourite Child Church

Demo · Church Live

- Built a real-time check-in app where ushers sign people in on phones and every device updates in seconds
- Live dashboard tracks **~80 people** and flags follow-ups by missed services (3 = amber, 5+ = red)
- Troubleshoot real incidents to the root cause using logs and errors, e.g. a login lockout and failed deploy
- Wrote plain-language guides and walked non-technical leaders through getting started

PROJECTS

Human Nutrition Unit Platform (Capstone) | *React, Tailwind CSS, Figma* | [GitHub](#)

2026

- Talked with the client, a University of Auckland research unit, to understand what they needed
- Designed the whole platform in Figma, turning complex workflows into clear screens
- Worked with a team of developers to build the frontend in React and Tailwind CSS
- Fixed the remaining bugs and issues at the end of the project to get it ready for release

Blogit | *PHP, MySQL* | [GitHub](#)

- Built a full-stack blogging platform in PHP using the MVC pattern
- Added user authentication and sessions backed by a MySQL database
- Deployed the platform live on the web

TECHNICAL SKILLS

Front End: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML/CSS, Figma

Back End: REST APIs, Payload CMS, Stripe, OAuth, Python, PHP, C#/.NET

Data: SQL, PostgreSQL/Supabase, MySQL, Streamlit, data cleaning
